

Specific attention should be paid to integrated crisis planning, caregiver supports, and community-based mental health services to minimise ED use. Variables like age, sex, and ASD symptom severity did not predict ED use, meaning that we have to think about how to best support all adolescents and adults with ASD to prevent emergencies from happening.

About the Researchers

Yona Lunsky Ph.D., C.Psych, clinician scientist, and Anna Palucka Ph.D. C.Psych, clinical psychologist, are associated with the Adult Neurodevelopmental Service at the Centre for Addiction and Mental Health and the University of Toronto in Toronto, Ontario.

Melissa Paquette-Smith MA, graduate student, and Elspeth Bradley MD MB BA, psychiatrist, are associated with the University of Toronto in Toronto, Ontario.

Anna Durbin is a postdoctoral researcher associated with the Centre for Addiction and Mental Health, the University of Toronto, and the Canadian Mental Health Association in Toronto, Ontario.

Jonathan Weiss, Ph.D., C.Psych, is an Associate Professor in the Department of Psychology at York University in Toronto, Ontario.

Autism, Medications, Drugs, Mental Health

This research summary was written by Ami Tint for the Chair in Autism Spectrum Disorders Treatment and Care Research. This research summary, along with other summaries, can be found on our [blog](#) and at asdmentalhealth.ca/research-summaries

About the Chair

The Chair in Autism Spectrum Disorders Treatment and Care Research is dedicated to studying ways to improve the mental health and well-being of people with Autism Spectrum Disorders (ASD) and their families in Canada.

The Chair is funded by the Canadian Institutes of Health Research in partnership with Autism Speaks Canada, the Canadian Autism Spectrum Disorders Alliance, Health Canada, Kids Brain Health Network (formerly NeuroDevNet) and the Sinneave Family Foundation. Additional support from York University.
